ICT for Sustainable Homes in Nice: EnRiMa project presents the workshop “DSS systems: modelling energy flows at both operational and strategic levels”

EnRiMa project will be at the “ICT for sustainable Homes” conference and exhibition in Nice, France, on the 24th-25th October 2011, with a dedicated workshop along with other four EU funded projects E3SoHo, SportE2, Energy Warden and Tibucon.

EnRiMa project is presented during the workshop “Challenges, Opportunities, and Lessons Learned from ongoing Research Projects” taking place on the 24th October 2011 at 4 pm. The workshop is jointly organised with four EU projects [E3SoHo](#), [SportE2](#), [Energy Warden](#) and [Tibucon](#).

EnRiMa partner, Dr Krystsina Bakhrankova (SINTEF, Norway) will participate with a session on “DSS systems: modelling energy flows at both operational and strategic levels”, to introduce the main project’s achievements. The DSS will enable operators to control energy flows in energy-efficient buildings and areas of public use. The session will end with a panel discussion around the future challenges and opportunities, moderated and chaired by Christian Mastrodonato from ICT4E2B Forum project.

ICT for sustainable homes is an international conference and exhibition organised every year in Nice, France, by Sigma Orionis in cooperation with the Beywatch project funded by the European Commission’s DG Information Society and Media. The conference aims at providing companies, research laboratories and other organisations involved in ICT based products and services for the home with a key opportunity to meet and network, to be informed of latest promising technologies and find potential partners to initiate or strengthen projects.

Conference’s details, agenda, exhibitors’ list available on the event website
