Johannesson, P., & Perjons, E. (2014). *An Introduction to Design Science*. Springer.

*My major contribution in the book is the development of the design science framework as well as the chapters describing problem explication, design and development, and demonstration. I have contributed to around 40 % of the book.*

Johannesson, P. & Perjons, E. (2017). Untangling the Web of Practices - Designing Information Systems in Context, accepted to be published in the journal *Systems, Signs & Actions*.

*The order of the authors' name was based on alphabetic order. I have contributed to all part of the paper in tight collaboration with the co-author. I have contributed to around 50 % of the paper.*

I hereby confirm that Erik Perjons has contributed to the book and the paper according to the description above

---

Paul Johannesson

Stockholm 2017-05-31

Henkel, M. & Perjons, E. (2011): E-Service Requirements from a Consumer-Process Perspective, In: Berry, D. and Franch X. (Eds.) *Requirements Engineering: Foundation for Software Quality, 17th International Working Conference, REFSQ 2011, Essen, Germany, March 2011, Proceeding*, LNCS 6606, Springer, pp. 121–135.

*The order of the authors' name was based on alphabetic order. I have contributed to all part of the paper in tight collaboration with the co-author. I have contributed to around 50 % of the paper.*

I hereby confirm that Erik Perjons has contributed to the paper according to the description above

Martin Henkel

Stockholm 2017-05-31

Henkel, M., Perjons, E. & Sneiders, E. (2017). Examining the potential of language technologies in public organizations by means of a business and IT architecture model. *International Journal of Information Management*, 37(1), pp.1507-1516.

*The order of the authors' name was based on alphabetic order. I have developed the business and IT architecture of the paper, and the problem description. I have contributed to around 40 % of the paper.*

I hereby confirm that Erik Perjons has contributed to the paper according to the description above

Martin Henkel

Eriks Sneiders

Stockholm 2017-05-31

Bider, I., Johannesson, P. & Perjons, E. (2013). Design science research as movement between individual and generic situation-problem-solution spaces. Book chapter in: Baskerville, R., De Marco, M., Spagnoletti, P. (eds.) *Designing Organizational Systems, Lecture Notes in Information Systems and Organisation*, Vol. 1, Springer, pp. 36-61.

*The order of the authors' name was based on alphabetic order. I have developed the theoretical approach together with the first author of the paper. I have contribution to around 30 % of the paper.*

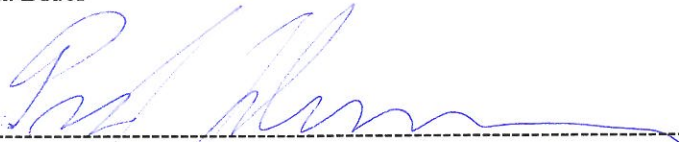

Bider, I., Perjons, E., Elias, M. & Johannesson, P. (2016). A fractal enterprise model and its application for business development. *Software & Systems Modeling*, pp. 1-27, doi:10.1007/s10270-016-0554-9.

*I have developed the theoretical part, the fractal enterprise model, together with the first author of the paper. I have contributed to around 30 % of the paper.*

I hereby confirm that Erik Perjons has contributed to the papers according to the description above

**SV: Confirmation**

Göran Goldkuhl [goran.goldkuhl@liu.se]

Du svarade 31.05.2017 22:31.

**Skickat:** den 31 maj 2017 22:23**Till:** Erik Perjons

I hereby confirm that the mentioned description of author contribution is correct.

/Göran Goldkuhl

Professor in information systems

Linköping University

**Från:** Erik Perjons <perjons@dsv.su.se>**Skickat:** den 31 maj 2017 18:46:15**Till:** Göran Goldkuhl**Ämne:** Confirmation

Dear Göran Goldkuhl,

Can you confirm in this email that Erik Perjons has contributed to the paper according to the description below?

The paper:

Goldkuhl, G. & Perjons, E. (2014). Focus, Goal and Roles in E-Service Design: Five Ideal Types of the Design Process. e-Service Journal, 9(2), Indiana University Press, pp. 24-45.

Erik Perjons' description:

The order of the authors' name was based on alphabetic order. Erik Perjons has written the introduction and contributed with the description of two of the five ideal types as well as the descriptions to several of the empirical examples. Erik Perjons has contributed to around 50 % of the paper.

Kind regards,

Erik Perjons
